Opta Minerals is a vertically integrated producer, manufacturer, distributor and recycler of silica-free loose abrasives, industrial minerals, specialty sands and related products for use primarily in the foundry, steel, marine/bridge cleaning and municipal water filtration industries. The Company has experienced solid growth since July 1995, through a combination of internal growth and successfully integrated strategic acquisitions to become one of the dominant regional suppliers of silica-free loose abrasives in a number of select markets on the east coast of North America. These results were achieved while the Company was an operating group of SunOpta and during a period in which SunOpta dedicated the majority of its resources to building its core organic and natural food business.

The Company currently has production and distribution facilities in Ontario, Quebec, Louisiana, South Carolina, Virginia, Maryland and New York and one of the broadest product lines in the industry. Recognizing that the fragmentation and lack of consolidation among suppliers in its industry has provided it with a strategic growth opportunity, the Company intends to capitalize on this opportunity to become one of the dominant North American suppliers of silica-free loose abrasives while at the same time leveraging this core expertise to expand its breadth of services and product offering in other industrial minerals
