Bimac has provided the steel and foundry industries with a wide range of technical services and steelmaking consumable products since 1974. These products are manufactured from the highest quality raw materials, under carefully controlled manufacturing processes, to proven formulations and therefore provide economic and consistent answers to many steelmaking problems.

Bimac product acceptance has been based upon proven technology and efficient service, which has enabled us to respond to customer requirements in a timely and innovative manner. Research and development efforts continue to technically and economically improve our existing product line and expand into new market areas. Bimac customers range from electric arc furnace to fully integrated steel mills, and extend from traditional and thin slab casters, billet and bloom casters, to bottom pouring ingot teeming. Bimac customers include: Alleghany Technologies, Arcelor Mittal, Charter Steel, Essar Steel, Gerdau Ameristeel, Nucor Steel, Republic Engineered Products, Severstal, The Timken Company, United States Steel.

The mission of Bimac is to develop, market, and manufacture consumable products for the metal melting industries that consistently meet, and where possible exceed, its customers' quality and techno-economic needs. Bimac will maintain a leadership position of product quality and superior service in those markets it serves. Bimac will continually strive to improve product quality and reliability at reduced costs with an ongoing program of innovative value engineering.

Bimac products have a well deserved reputation for:

- High quality
- Cost effectiveness
- Reliability
